OPENING UP COAL BEDS.

Harmony Company Making Mines

Near Utah Iron Deposits. A. A. Kirker, manager of the Harmony al company, came in from the propers the first of the week, bringing some e samples of hard coal from a five-foot in recently cross-cut by tufnel No. 4, ree-quarters of a mile south of shaft of the line, the coal is of a splendid quality, suitate for smelting purposes, says the Dixie luocate.

one-half mile north of shaft No. 2, on one-half mile north of shaft No. 2, on in No. 5, a nine-foot vein of splendid an coal was opened up some little time ace, and every week fresh bodies are sing blocked out and the value of the posits increases accordingly.

rhe development of the Harmony semi-

anthracite coal seems to offer a satisfactory solution for the fuel problem in the manafacture of irote in this county. Haif cole and half coal from these deposits will make an ideal fuel for the smelting of iron, and one-half the expense of transportation of coke will thus be saved. The matter seems to be simmering down to this plain fact; Iron county has been endowed by nature with the natural faculties for becoming a great iron manufacturing center, and try as they will capitalists cannot much longer stave off the inevitable. Somebody is going to take advantage of these resources and enjoy the profits.

If the corporations owning stock in the railroads that benefit by the tariffs on eastern-manufactured iron will not do it, it is only a matter of time until other capitalists will take the plum from between their fingers.

God never placed all these mammoth bodies of natural wealth here for nothing, and it is useless for men to try to stay the hand of Providence.
